DETAILED ACTION

1. This communication is responsive to Amendment filed 09/23/2005.
2. Claims 1-27 are pending in this application. Claims 1, 15, and 25 are independent claims. This Office Action is made non-final.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-14, 15-24, and 25-27 clearly recite a method, program, and system respectively for calculating a linear minimum convolution according to a mathematical algorithm. In order for such a method, program, or system claim to be statutory, the claim(s) must recites a useful, concrete, and tangible result with respect to the disclose practical application. However, claims 1-27 appear to be an abstract idea or mathematical construct rather than a practical application of the idea by computing the linear minimum convolution of a piecewise linear function including plurality of segments. Therefore, claims 1-27 are clearly directed to a non-statutory subject matter.

Response to Arguments

5. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.
